Sven Hansen

Sven Hansen lives and works in Berlin, where he also earned his degree in industrial design. He designs premium, manual crafted upholstery furniture but also highly industrial produced products. His way of designing reflects this dualism between craft and technology, as he combines up to date computer technology with hand crafted clay models.   Especially for furniture with mechanical functions, that enable dynamic seating, it is just perfect to combine these two worlds. The result is seating furniture that is flexible for all situations of life but with a sustainable, stand alone elegance beyond fashionable moods.
