

#### **ICARUS LOUNGE : IKONISCHE SCHÖNHEIT**

Inspired by the reclining chairs of the ancient Romans, the shell shape of this lounge chair envelops the entire body. It was designed as a pure sculpture, but in truth it is a cozy cocoon. Essential form for an overwhelming comfort experience.

#### **CHRISTOPHE GIRAUD : EIN VOLLENDETER DESIGNER**

French architect and graduate of the famous "Ecole d'Architecture de Normandie". Giraud has already covered the complete palette of architectural projects with great success: from designs for public and private buildings to the design of exhibition and meeting rooms, up to the design of packaging and utensils. He describes architecture as "the search for balance between space and matter, between form and function".
